### **DETAILED ACTION**

1. This Office Action is in response to the Amendment filed December 26, 2002 which has been entered into the record of file.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 54 and 60 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Snyder et al (U.S. Patent No. 6,252,608).

Art Unit: 2671

As per claim 54, Snyder et al teach a method and system for improving shadowing in a graphics rendering system comprising a step of identifying a plurality of pixels, each of the plurality of pixels associated with a corresponding depth value (col.13, lines 33-44), a step of determining whether the depth values associated with the plurality of pixels are compressible for compressing the depth values and storing at least one indication of the compressed depth values in a compressed format (col.15, lines 15-26) and a step, responsive to the depth values associated with the plurality of pixels being non-compressible, of storing at least one indication of the depth values in a non-compressed format (col.14, lines 17-40).

As per claim 60, Snyder et al further teach a step of determining a difference between the depth value for the first pixel and the depth value for the second pixel (col.15, lines 19-42).

### *Conclusion*

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be

Art Unit: 2671

calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
